

AIGI 26 (General Service Pump Packing)

Product Description

AIGI 26 is braided from PTFE yarn and then coated with a graphite dispersion to dissipate heat, AIGI 26 is a dense braid which ensures excellent leakage control, less lubricant migration, less frictional heat build up and excellent heat dissipation for longer life. As a low-friction packing, AIGI 26 is used widely in general service pump applications as well as the toughest chemical applications.

Property	Value
Color	Black
Temperature	240°C (465°F)
PH Range	0 ~ 14
Speed	10m/s (2000 Ft/min)
Pressure	40kg/cm ² (580 PSI)

Application

Universal pump packing suitable for chemicals, water, acid, alkalis and light slurries
