

AIGI SSP (Special Slurry Packing)

Product Description

AIGI SSP Packing is braided using a mix of high carbon content carbon fibers and PTFE yarn and then finish lubricated with high quality graphite. The high temperature resistance ,strength, self-lubricating properties of high carbon fiber combined with the flexibility, chemical resistance and stuffing box conformability of PTFE fibers makes AIGI SSP the optimal choice for slurry applications in industries such as mining, pulp and paper, metals processing and power.

Property	Value
Color	Black
Temperature	260°C (500°F)
PH Range	0 ~ 13
Speed	15m/s (3000 Ft/min)
Pressure	25kg/cm ² (350 PSI)

Application

Virtually all pumps, mixers and agitators in most slurry applications
